

PARTIALITY SHOWN REGULAR OFFICERS

All Emergency Men Ask
Equal Pay With West
Pointers

STOP DISCRIMINATION

Disabled Emergency Officers
Form Union to Press Their
Claims Before Congress

By HARRY W. WARD
WASHINGTON, D. C., Aug. 14.—The disabled emergency officers of the world war, with national headquarters here, are conducting a vigorous campaign in congress for the elimination of alleged discrimination between volunteers and West Pointers in the matter of retirement pay.

The first real victory came when the senate received from its military affairs committee a favorable report to retire emergency officers who were disabled in service with the same retirement compensation as now goes to retiring military academy officers who are retired because of disabilities.

Officers of emergency officers who are still in the hospitals have already joined the officers' union, having as its object the pressing of their claims, and since the senate received the report from the military committee there has been a steady flow of applications from disabled leaders in all parts of the country joining the association.

With a bitter fight now on against the proposed adjusted compensation the disabled officers think there is more reason than ever before that they should be most active, and many congressmen and senators have received letters from home asking that they support the bills for the elimination of alleged bias in favor of the regular officers.

Section 10 of the selective service act that "all officers and enlisted men of the forces herein provided for the other than the regular army shall be in all respects on the same footing as to pay, allowances and pension as officers and enlisted men of corresponding grades and length of service in the regular army."

Unfairness Is Charged.
The Disabled Emergency Officers' union is pointing out that the only pension allowed officers of the regular army for disability is retirement pay and it is claimed that congress said in the selective service act that the emergency officers were to receive the same treatment. It is on this point that the volunteers are making their fight, which has become more intense since the claim was made that the war department is opposed to the proposed legislation now before congress.

It is pointed out that the records show only 5 per cent of the West Pointers said to be officers as against the officers and the volunteers who led the vast majority of the regular army, national guard and national army militia and today are facing physical impairment and are not being fairly treated.

The national headquarters of the officers here is of the opinion that favorable legislation will be properly acted upon when it comes before the house and senate in open session and it is in order to strengthen their ranks that they are now enlisting members to their organization. The American Legion has already gone on record in national convention supporting the bill and the officers' society is working closely with the legion in attempting to reach its objective.

RANGE OF COTTON PRICE IS NARROW

Fluctuations Are Within
Limits of 54 to 64
Points in Week

NEW ORLEANS, Aug. 14.—The range of prices in the cotton market last week was unusually narrow, fluctuations being within limits of 54 to 64 points. The highest prices were made in the earlier sessions while the lowest prices came just after the middle of the week. At the highest, the trading months were 4 to 15 points over the close of the preceding week and at the lowest they were 35 to 53 points under.

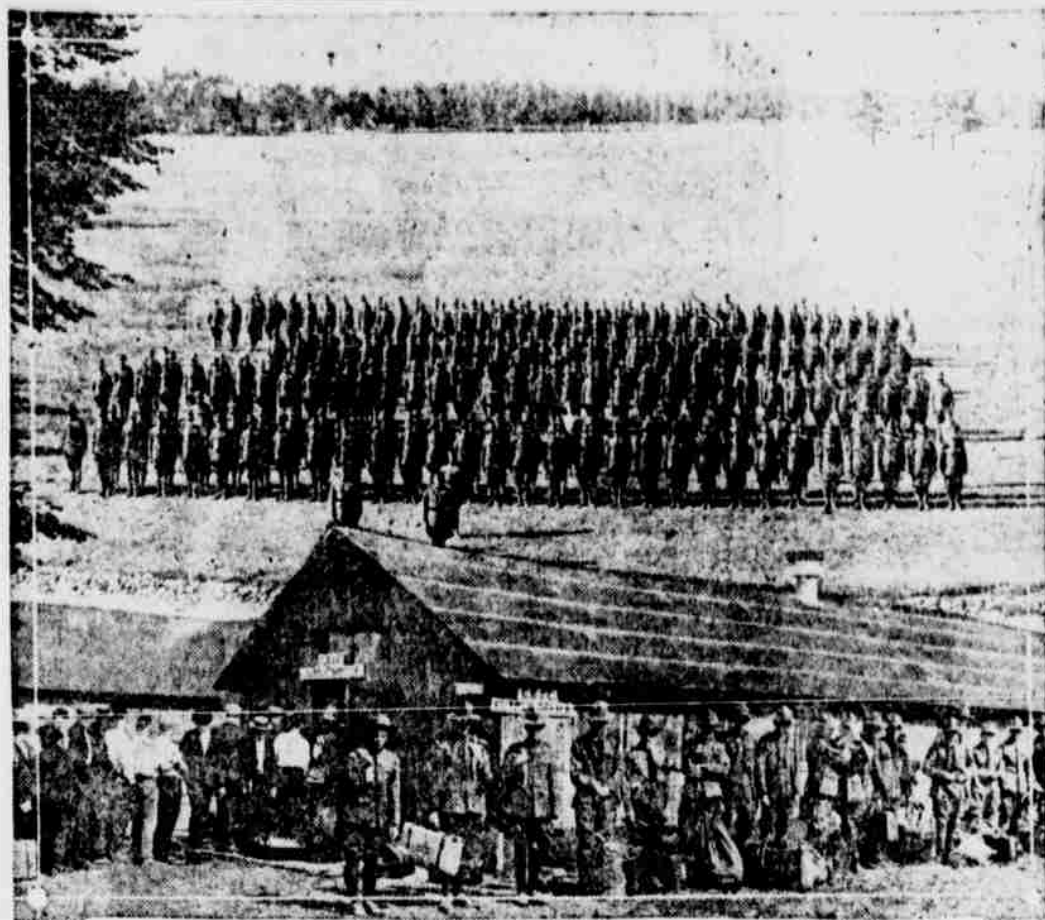

October sold up to 13.15c, fell off to 12.40c, and closed at 12.35c. In the spot department middling lost 12 points, closing at 12.15c, contracts in the net results lost 12 to 23 points.

Advances Due to Covering.
The advances of the early part of the week were due in great measure to covering of the short interest in unfavorable crop accounts and all these a steady influence, but the absence of any very big spot demand prevented any big reading on the long side and covered as its foundation.

Prices for July, out during the week were unfavorable showing a slight export from Great Britain and small consumption in India and they caused more sections of the belt sent complaints of one kind or another and general opinion was that August deterioration was more than usually severe.

Unpaid telephone bills for August are past due, if not paid by 5 p. m. of the 15th, service will be discontinued.—Advt.

Plattsburg Training Camp Has Atmosphere of Pre-War Days

Lower photo shows batch of rookies going into barracks, at left of photo, and another group lined up "company front" before the barracks ready for duty. Upper photo shows first battalion, commanded by Maj. Julius Ochs Adler, having first review on drill grounds on shore of Lake Champlain.

Plattsburg training camp is once more alive with military activities, bringing back scenes of pre-war days with the presence of uniformed men and war equipment. The men in training at the summer camp are members of the Provisional Regiment

of the citizen's army training corps. The photos give two interesting glimpses of the boys in camp.

ALL HANDS SEEK LUXURY OF WATER

New York's Millions Are
Crazy About Shower
Baths

NEW YORK, Aug. 14.—The scorching summer of 1921 has made all New York want to go a-swimming—but there isn't room enough for all to swim.

On week-ends it's a strong man who can battle into bathhouses at nearby beaches and even if there were more bathhouses, it's hard to imagine how many more thousands could gain foothold on the crowded sands.

So, from city hall down, everyone is trying to locate new swimming holes, and a twentieth century swimming hole in America's largest city is a costly proposition. Mayor Hylan has used construction of a swimming pool in Central park and it has been suggested that an unneeded reservoir be converted to the use of a swimming pool.

Meanwhile, special shower baths have been built in tenement districts, street cleaners hosing the heated pavements wash down youngsters for the asking, and in the smaller parks dotting the city the police aren't quite so zealous in driving amphibious street urinals out of the fountains.

The world's largest swimming pool has been opened in Madison Square Garden, dock-diving along the Hudson, Harlem and East rivers is as popular as ever, and now and then a neighborhood produces something unique in the way of a bathing tub.

For instance, the firemen at the Greenwich Village station have built a wooden pool for the neighborhood youngsters, and artists and poets of the section lay aside palette and pen every day to watch a young woman instruct her splashing pupils there.

One Step Worse.
If you think it's hard to get a telephone number, just try to get a telephone installed.—From Life.

A MAN IN EACH JAR

The merchant, physician, lawyer or millionaire are all alike in one regard—they admire the girl who is careful of her personal appearance. Few real virile men become interested in slipshod, unkempt careless girls. A clear ungarmented complexion charms men as well as nothing else. If your skin is rough and rusty, with freckles, mole patches, liver blotches, tan, pimples or blackheads, a jar of Golden Pearly Cream will quickly and harmlessly bleach them out, and make it easy for him to tell you what you want to know. You'll notice a vast difference after one application of this marvelous cream, your friends will notice it after five days, and out of this improvement may come a Prince Charming. Golden Pearly Cream bleaches smooths and softens at the same time, leaving the skin pure and healthy, which needs only a touch of Golden Pearly Face Powder to complete an enviable complexion. At your druggist's or by mail \$1.00.

Quite Different

From the Pittsburgh Chronicle-Telegraph.
Young Willie Wakewick had not been to school for a whole week, hence the visit from the truant officer, who demanded of Willie's mother the cause.

"Well, if yer must know," she answered, "he's past his thirteenth year, an' me an' his father took him he's had schooling enough, sir."

"Schooling enough," echoed the officer. "Do you know, madam, I did not finish my education until I was 23."

"Yer don't say?" said the mother, in astonishment. "But, then, yer see," she added, confidentially, "that boy of ours has brains."

Rye Acreage Increases.

ST. LOUIS, Mo., Aug. 13.—While two factions of St. Louis county officials are engaged in the bitterest "liquor war" in the history of Missouri, farmers are going complacently on their way of planting the wherewith of "white mule."

The rye acreage in Missouri, according to statistics made public by the census bureau of the department of commerce, shows an increase since 1909 of 87,421 acres.

The state department says that the most satisfactory way to dispose of an American flag which has become too old for service is to burn it.

MENNONITES TO SOUTH AMERICA

Plan Colony in Paraguay
Where They May Be
Free to Worship

ASUNCION, Aug. 14.—Paraguay will become the refuge and home of Mennonites from the United States and other parts of the world, if a

bill sent to the chamber of deputies by President Gendar has become a law. The bill provides that the state will give some time ago from the United States have negotiated for the purchase of about 5,000 square miles of land in the great Paraguayan "chaco" for purposes of colonization conditional upon the Paraguayan government granting privileges which will permit them to conduct the colony in conformity with the tenets of their religion and their system of common administration of their properties called "Wintzenburg."

President Gendar has recommended to the house that these concessions be made, which include the exemption of the Mennonites from

military service either in peace or in war, the prohibition of the sale of alcoholic beverages in their territory, the right to establish their own schools, which would be conducted in the German language, and in addition, the privilege of importing free of duty household articles and agricultural implements for a period of ten years.

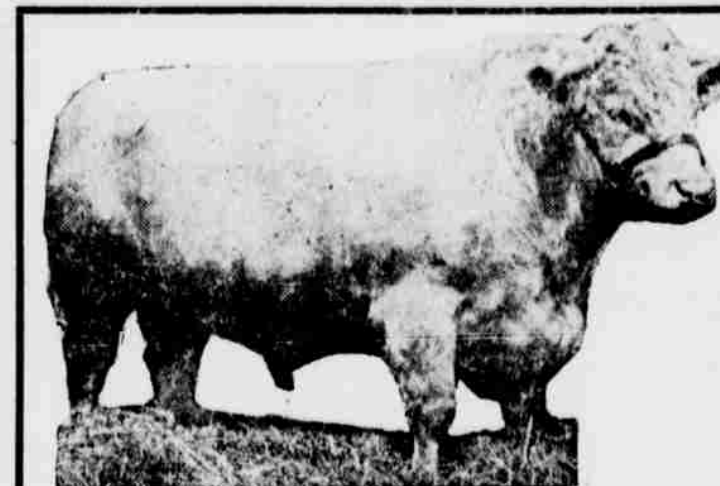

The president says that the establishment of the colony would be a beginning of the solution of the problem of populating the republic and augmenting its productive capacity, there being vast stretches of uncultivated territory of great productive value. He accompanied his recommendations with a history of the Mennonites, reciting their quali-

ties of industry, self-discipline and "collective virtue."
The delegates have notified the government that upon the approval of the measure more than 4,000 Mennonites in the United States, Canada and Russia are prepared to emigrate to Paraguay.

Natural Preference.
Few heavy drinkers according to the dyes, can ever hope to rise to high places in the world. But there are many who would rather be tight than president.—From Life.

Boast.
